STAIRS, BALCONIES and BALUSTRADES

All our projects are specially designed and custom built, so each is unique, ranging from a simple and elegant polished steel handrail, to a full staircase and balustrade. We aim to provide you with a feature that complements its surroundings, whether its an internal main stair, an external balcony or balustrade, or combining modern and traditional designs.

BURNHOUSE ENGINEERING LTD

STAIRS, BALCONIES and BALUSTRADES

'As featured on Grand Designs'

We designed this stair for the TV programme house in Scotland.

The original concept to a tight budget was for a stair in mild steel, but we were able to re-design the feature and build it in stainless steel to much greater overall effect.

BURNHOUSE ENGINEERING LTD

STAIRS, BALCONIES and BALUSTRADES

Features

Main support - Stringer

The basic feature of a staircase is the main support or stringer. This can be designed as two side supports, a single central stringer, or, if your building suits, potentially your stair could be adapted to existing features.

Double stringer - side supports

Single stringer - central support

STAIRS, BALCONIES and BALUSTRADES

Features

Balustrades - side panelling

Side panels of staircases, or the infills or balustrades can be designed to give an 'open effect' through the use of glass or rigging wire.

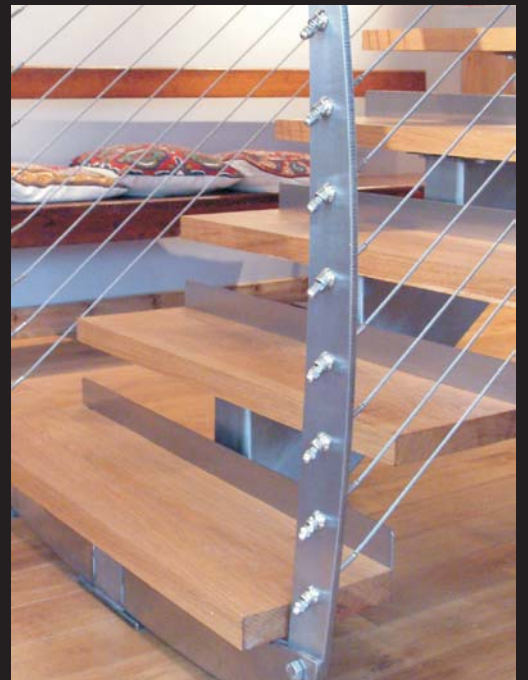

STAIRS, BALCONIES and BALUSTRADES

Features

Treads

These also can be designed within Building Regulations to give either an open effect or solid feature, from quality woods, polished metal, chequer plate or even glass.

STAIRS, BALCONIES and BALUSTRADES

Complete package

Stainless steel single stringer stair, glass balustrade with stainless steel supports and fittings, polished stainless steel handrail and discreet lighting effects - designed, manufactured and installed.

STAIRS, BALCONIES and BALUSTRADES

Attention to detail

Overall effect is one thing, but it's attention to detail that really makes the difference. We apply this approach to selection of appropriate fixtures, fittings and supports, as well as to finishes.
