

INTRODUCTION

'the solutions provider'

Burnhouse Engineering can provide a unique range and package of services to suit your requirements, from total solutions to supply of individual components.

Specialities include:

- Design Input
- Consultancy
- Project Management
- Artistic Design
- Architectural Steelwork
- CAD Drafting
- Prototyping
- CNC Cutting
- Plasma Cutting
- Fabrication & Welding
- Machinery Overhaul, Installation & Removal

Materials handled:

- Carbon Steel
- Stainless Steel
- Aluminium
- Plastics

Burnhouse Engineering, established on 1 April 1989 specialises in providing customers with a fast and efficient high standard of service.

What makes the real difference to service is good people, and that's where Burnhouse Engineering is different. Our enthusiastic, well-trained and motivated team are 100% committed to you, our customer. The achievement of Investors in People demonstrates this commitment.

Key contacts:

Jimmy Burwood Managing Director 07976 620 187

For Design Consultancy and General project enquiries.

Gordon Reid Quotations Manager

Progresses all quotes through our costing system. Gordon works closely with Jimmy to ensure your quote is accurate and reaches you on time.

Mary Burwood Company Secretary

Accounts processing

Steven Smith Designer/Draftsman

Specific design queries, technical specs, drawings and AutoCad.

Design and Consultancy

Burnhouse Engineering offer a unique bespoke design service tailored to suit your requirements using computer aided design.

Tell us your design concept. Through our innovative, out the box approach we will then help advise you of the different techniques available to turn your concept into a fit for purpose, practical cost effective design.

Alternatively we can take your existing design and rework it to reduce material usage, manufacturing time and lead times.

Burnhouse Engineering will visit your site or office, discuss your ideas and offer a complete solution. We have an in-house design team including access to structural engineers. Drawings can also be supplied. We will take every step within our capability to ensure that at the end of the job we have a very satisfied customer.

Project Management

The company has managed many projects from initial concept through to installation, commissioning and full operational efficiency, particularly in plant installation.

Artistic Design

Working closely with architects and artists we can turn your structural steelwork into aesthetically pleasing features that complement the environment.

Architectural Steelwork

Fabrications for highly visible steelwork that are functional and practical, but are also visually appealing.

Using our expertise and appropriate materials we can ensure lowest cost without deviation from your original concept.

CAD Drafting

The latest computer aided design technology is available. Drawings can be created or imported from your system to allow us to carry out your requirements.

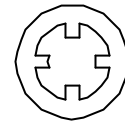

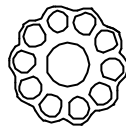

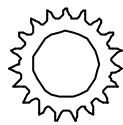

Drawings can be exported to our computer aided manufacturing equipment.

Prototyping

Burnhouse Engineering can test a radical or unique design concept by fabricating initial components for evaluation. Full scale prototypes can also be manufactured.

CNC Cutting

We can cut Carbon steel, Stainless steel and Aluminium any shape we can draw on Cad.

12 and 24-hour service available

Plasma cutting for up to 30 mm Profiles

Oxy Flame cutting for up to 100 mm

Architectural Shapes and lettering.

Plasma Cutting

New technology can assist with cutting requirements at your site on equipment that is manufactured from stainless steel, by:

Reducing plant down time

Reduce costs

Improve finished quality

Fabrication & Welding

All fabrication work is considered.

Fabricating can be undertaken on customer sites.

We can install the finished fabrication.

Fabrications can be treated with your specified protective coating.

Problem solving.

Friendly and helpful advice available.

Including tanks, platforms, guards and conveyors.

Architectural steelwork.

Artistic projects – Stainless steel curved fence, Gatekeeper picture frame.

Stairs, galleries and central divides

Balconies, stainless steel balustrades and handrails.

Stainless steel swimming pool and water treatment tanks.

Lifting Equipment.

Machinery Overhaul, Installation & Removal

For the complete **engineering solution** our engineering and maintenance team can offer you a service to maintain, overhaul or install your plant and equipment. Complementing your existing maintenance department.
